

To Whom It May Concern

I have known Md. Tariqul Islam Bhuiyan for more than one year as his director, working together in the same workgroup. During the time he worked for our company, he was always dedicated and focused on his work. He always took the assigned works to him as a top priority, completed them with perfection and became an influential contributor to our organization's success.

Tariqul was employed by Computer Ease Limited as a Junior Programmer Analyst from 1st February 2020 to 15th May 2021. He learned the complex business logic of the "Payroll Management System" in a short time. From my point of view, breaking down any difficulties while facing complications in work was one of his finest capabilities. He had vast technical and server-side knowledge which he used during his time at our company. His responsibilities included creating new modules and giving support to already developed software. As I had the opportunity to observe him closely, I found that from coding, database query generation to server deployment, he did everything efficiently. Being able to fix bugs in such a short time indicated how skilled he was as a programmer. Reviewing his works, I understood he has a perfect understanding of object-oriented programming, design patterns and is capable of writing codes that can be reused in other projects. Whenever Tariqul attended client meetings, he always tried to give his best opinion to develop a feasible and excellent solution. He always focused on the requirements of the clients and then he discussed with his whole team and finally was able to find concrete solutions and fulfill the clients' needs with satisfaction. Helping newcomers to cope with the office environment and inspiring them to work as a team were gestures of his admirable personality. To be honest, he became one of my dependable developers because of his versatile qualities who could deliver his work in time.

I have always been impressed with his professionalism, dedication, creativity, communication, leadership and organizational qualities alongside his technical knowledge. Thus, he has my highest endorsement for admission into his desired course at your university. Please do not hesitate to contact me if you have any further questions regarding his background or qualifications.

Sincerely,

Md. Salauddin Shamim

Director
